"I prefer illegal graffiti because of the rush you get painting illegal spots, and the fame for your name is much bigger then legal spots"  
SURCH

**SURCH** started bombing the streets of Rotterdam since 1989. First only tags, not much later, the whole shabang...

**010 KILLER**

"At first it was CE553 that influenced me the most, he had the best style and pieces, and was up in the early 90's, he did alot fresh color and silver pieces on walls and trains. JIZE and BASE inspired me since I know them since the beginning of my graffiti career, they lived in my neigherhood, JIZE also made fresh color pieces and BASE was a bomber his tags were everywhere from south to the west."

"Stay true, stay real, dont fake the funk, and keep piecing.. Peace yall!!"

SURCH

"One day we decided to go in the subway tunnels around 2005, it was me, BUD (rip), ROUGH and BISQ we had to climb a high fence, ROUGH was first to go and he made it up to the tracks, Then I tried to make it up the high fence when suddenly a security guard with flashlight came at us. I saw him first, and jumped downstairs and fell on BUD, he propably was hurt a bit but we kept running to another normal fence and got over and got away!!

BUD kept running far away from us and we didn't seen him again that night, Me and BISQ went all the way back to another platform station to get at ROUGH who still was there waiting for us because we called him on the phone to wait. When we saw him we went in doing our thing and bombed the tunnels with tags throws and pieces!"
